

Install Talyx in ChatGPT desktop

Start here. Follow these steps in order.

You need ChatGPT desktop with access to Work locally.
Talyx is free. Your ChatGPT plan or usage charges are separate.

1 Open the plugin menu

Open ChatGPT desktop.
Click Plugins in the sidebar, then click Add.

2 Add Talyx's marketplace

Choose Add a marketplace.
Paste this address into the Source field:

```
https://github.com/ShiftedReality12/Talyx-Plugin
```

Leave Git ref and Sparse paths blank. Click Add marketplace.

3 Install the plugin

Find talyx-skills in the talyx marketplace.
Open it and click Install. Wait for installation to finish.

4 Start Talyx Setup

Start a new task using Work locally. Choose your work folder.
Type @, select talyx-setup, and ask it to set up Talyx.

5 Answer the questions

Fill in the short questions. Setup saves your settings for Talyx skills.
A worksheet is optional.

Need help?

If Add a marketplace is missing, ask your administrator or Talyx contact to check your desktop app access.
